

# Smartphone Control

(Free Smartphone Car Control)

## INSTALLATION HANDBOOK

Smartphone Control  
ios and android mobile  
phone download

**No Service Plan Required!**  
**Remote start, lock, or unlock your car from up to 120 feet away via bluetooth.**

For a more convenient and interactive connection to the vehicle, directed BT system provide smartphone control via RF smart technology and the directed smartstart mobile app.

**To download the app:**

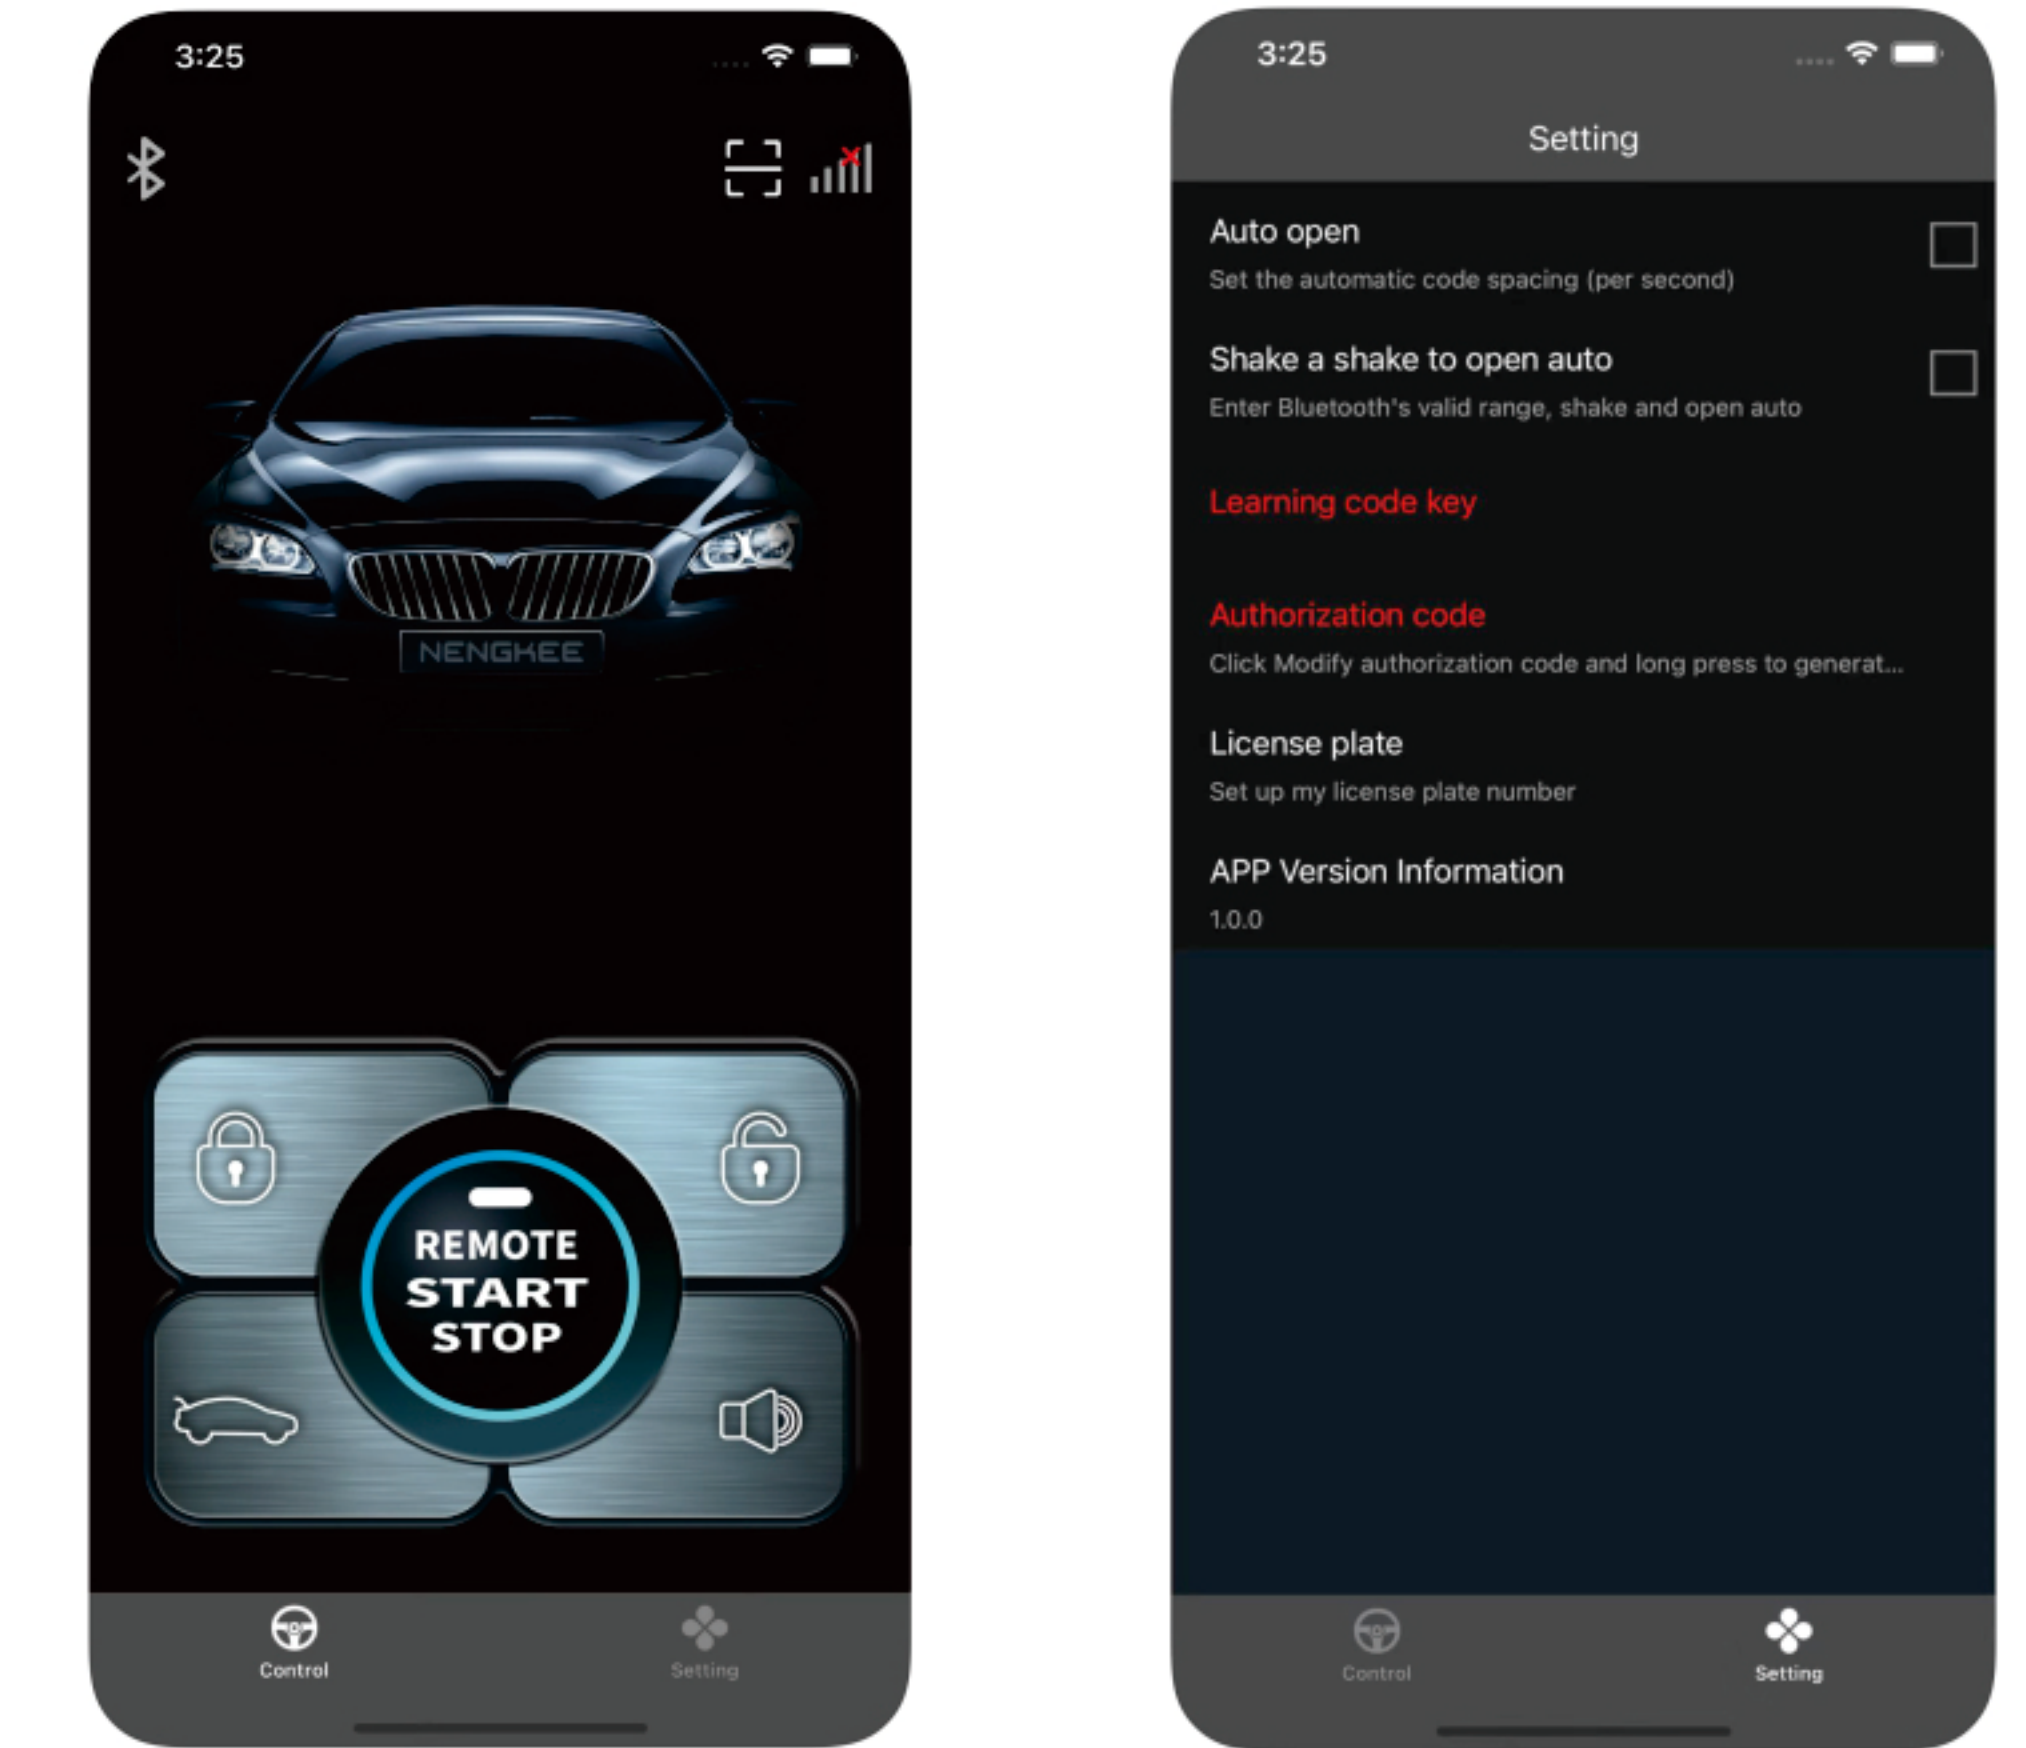

Scan the QR code smartstart in your mobile app portal.

This suitable for ios and android mobile phone system.

### Pairing your smartphone to the system

This smartphone control functions works same as the remote control need to match with the unit, you just need to learn the code to control remotely.

1. Scan the QR code and download the app to your mobile phone.
2. Once you have downloaded the smartstart app, follow the in app instructions to learning code key and pair your phone to your remote start or remote start and security system.
  - A. Keep your mobile phone within two meters of the car for example do this in the car.
  - B. In turn on the bluetooth function of the mobile phone, meanwhile open the app interfac.
  - C. Enter the setting interface, click 'learning code' option, press the unlock buttons six times (1 time per second ) on the remote control at the same time for one second, then the code learning process finish.
  - D. Click 'control' option and get back to the control interface.
  - E. Control the app mobile phone button, nengkee system function works is ok to confirm the remote has been paired.
  - F. If learning code fails, please repeat the same procedure learning code.
3. If add use another mobile phone control the car.
4. Click modify authorization code and long press to generate QR code.
5. To download the Smartphone RF control the app, meanwhile open the app interface use the app to scan the authorization code, to confirm the app authorization, now your can use the mobile phone.

Note: control distance is about eight meters, but with different controlling angles and different cell phone brands, the distance will be slightly different. after one cell phone has done the code learning process, if use another cell phone and learn the code again, the previous one will lose the code and can not control the car anymore, this can ensure the vehicle safety.

### Basic Commands at a Glance

\* See your Remote Start system user's guide or installer for important information about starting a manual transmission vehicle and how long the engine will run when remote started.
